

Come out of your shell and swim with us!

Hubbard Family Swim School

Teacher Spotlight: Natalie Marion

Natalie was born and raised in Phoenix, AZ. As a child she was interested in sports and spending time with her twin cousins who are the same age. She began swimming competitively at age 5 and continued through high school. She attended Pinnacle High School where she was a member of the Swim and Lacrosse Teams. During her Sophomore year she was captain of the J.V. Lacrosse Team and led them to a State

Championship! She is currently attending

Paradise Valley Community College and was awarded the Presidential Honors Scholarship. She is also one of the Honors Student Leaders at school, where she leads meetings and share knowledge with other students. Her future goal is to attend NAU in the Fall and earn her Bachelor's Degree in Geology.

In her free time she likes to travel with her family. They love to go to Sedona or Flagstaff to hike and camp. She hopes to hike the Grand Canyon and Mt. Humphrey someday soon. In the Summer of 2013 they traveled to Amsterdam and the Netherlands to visit her sister who was studying abroad at the time. "We spent our days biking around the city, exploring the culture, and in the outskirts, where we gazed at beautiful windmills." She also loves music and was in choir all 4 years of high school. She plays the piano and sings and has tried the drums and clarinet. She listens to all genres of music! She also enjoys writing and drawing.

Natalie has been with Hubbard Family Swim School since July 2016. You can find her in the water most days of the week, teaching mostly upper levels. She has held a few different positions at

Hubbard that include Snack Bar, Child Care, Swim Instructor, Front Desk and Deck

Supervisor. "Working at Hubbard has been the best experience that I have ever had. Building relationships and having fun with the kids gives me so much fulfillment and happiness."

Natalie is most passionate about learning. She enjoys taking classes on a wide variety of topics that include Astronomy, Communication, Geology, Psychology and Geography. "I like to be put into difficult situations where I must use my critical thinking skills to solve a problem. I like taking what I've learned in life and applying it to school and work."
